EDUCATION

KING MONGKUT UNIVERSITY OF TECHNOLOGY NORTH BANKOK (KMUTNB)

- GPA: 2.8/ 4.0

SKILLS

- Phyton
- Java
- HTML,CSS,Java Script,PHP
- SQL/Firebase/NoSQL
- Flutter
- React,React Native,Node.js
- Tensorflow

LANGUAGES

- English
- Thai

PROJECT

Library Mobile Application

- Developed a library service application for user with an admin backend system for managing services.
- Using Flutter for developed and connect to Firebase

Rice leaf disease detection Mobile Application

- Developed a mobile application for detecting rice leaf diseases using a Convolutional Neural Network (CNN) architecture. The application leverages AI and computer vision techniques to identify and diagnose diseases affecting rice leaf.
- Deployed a Keras model using Flask and developed a mobile application using Flutter, integrating Firebase as the database. Utilized FastAPI to incorporate the Keras model into the application.

Forum web application

- Developed a web application using HTML, CSS,JavaScript and PHP with Bootstrap for responsive design and integrated a MySQL database for data management.

Quize web appplication

- Developed and designed a quiz web application using React, improving performance through complex state management , real-time data processing and Rest API with Mongo DB.
